EXAMINER'S AMENDMENT

1. This application is in condition for allowance except for the presence of claims 3-7, 9-16, 18-19 directed to an invention and species non-elected without traverse. Accordingly, claims 3-7, 9-16, 18-19 have been cancelled.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

3. US Patent Application Publication No 2002/0107750 to Kanevsky et al discloses a method of operating a computer system on which an application is installed, said method comprising the steps of verifying whether a predetermined run authorization for the application is present, and, in the absence of said predetermined run authorization, decreasing the speed of execution of the application on the computer system as compared to the speed of execution of the application in the presence of the predetermined run authorization. US Patent No 5014234 to Edwards, Jr. teaches allowing software to operate for a limited time before disabling it if it is not properly registered. US Patent No 5442645 to Ugon et al teaches copy-protected programs set to degenerate further with each successive copying. US Patent No 6587881 to Agarwal et al teaches degrading the performance of software if too many active requests are made. Prior art fails to disclose or suggest wherein a rate of the decrease in the speed of execution of the application is increased with time.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
